

Mini report #2 (Advanced Automation) 2023.11.23

Student #: _____ Name: _____

[NOTICE]

- write by hand
 - due date: 2023/11/29 17:00; place of submission: **room 405 @ Dept. Mech. Bldg. 1**
 - don't answer in approximated values (write $\sqrt{2}$ instead of 1.4142 , for example)
-

Let M be a matrix given as:

$$M = \begin{bmatrix} 0 & -2 \\ \frac{j}{3} & 0 \end{bmatrix}.$$

Answer the followings:

(1) Show that $\bar{\sigma}(M) \geq 1$.

(2) Find a positive real number $d > 0$ such that $\bar{\sigma}(W^{-1}MW) < 1$, where $W = \begin{bmatrix} d & 0 \\ 0 & 1 \end{bmatrix}$.
